

## WE WILL RISE TOGETHER (Hali Hammer)

*We will rise together, we'll be wise together  
We will watch the winter turn into the spring together  
We'll hold hands together, we will band together  
We'll breathe in and out as one and we will rise, rise, rise  
Our hearts will pound as one and we will rise, rise, rise*

Millions rose upon their feet as they marched into the street  
To stir their souls and make their voices heard

In our cities large and small, young and old answer the call  
To show the world the best side of America.

**(CHORUS)**

We must not yield to fear, we must keep our message clear  
We must rise above the darkness to where our love lights beam  
- We must protect the rights of all within our sight  
Remember most of us are here because an immigrant had a dream

**(CHORUS)**

Now all across the country, folks are talking to each other  
As we share the need for caring so that we can carry on  
We never will give in, so collectively we'll win  
For the darkest night becomes the new light of a breaking dawn

*We will rise together, we'll be wise together  
We will watch the winter turn into the spring together  
We'll hold hands together, we will band together  
We'll breathe in and out as one and we will rise, rise, rise  
Our hearts will pound as one and we will rise, rise, rise*
